TC 1700 MAIL ROOM

In reply to the Office Action mailed May 22, 2002, please amend the above-identified application as follows:

IN THE SPECIFICATION:

Page 1, lines 8-16:

B9

Various kinds of plastic containers have been on the market as a container for, for example, foods, drinks, cosmetics, chemicals or the like, since they have a light weight, a lower danger of breakage, a low cost and the like. For example, plastic containers made of polyolefin resins such as polypropylene, etc. have been used as containers for general purpose having barrier properties against humidity. Also, plastic containers made of poly(ethylene terephthalate) resins have excellent transparency and oxygen barrier properties, and have been used as containers for various kinds of beverages having beautiful appearance similar to glass bottles.
